**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. Claims 1 and 5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The instant claims are not supported by the specification as originally filed. The specification only supports 97.5% ammonium benzoate in combination with 2% of a triazole and 0.5% of a wetting agent. There is no support for 97.5% ammonium benzoate in combination with about 2.5% of one or more additive components selected from the group consisting of silica, triazoles and wetting agents. In fact in the examples when the silica is present it is present in an amount of 5%, when the triazole is present it is present in an amount of 2% and when the wetting agent is present it is present in an amount of 0.5% or 5% depending on what it is combined with. When the ammonium benzoate is present in an amount of 97.5% it is in combination with 2% of benzotriazole and 0.5% wetting agent. Therefore it is believed that no proper literal support exists for claims 1 and 5 in the specification.

***Claim Rejections - 35 USC § 103***

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Derwent Patent Abstract No. 1992-250785.

The abstract teaches an aqueous anti-corrosion agent which is prepared by reacting benzoic acid and  $(\text{NH}_4)\text{HCO}_3$  in stoichiometric ratio, at 25-35 deg.C, by stirring in a solution. containing. 0.4-50 g/l of dimethylaminoethanol and 1-120 g/l of benzotriazole, to give 2.1-250 g/l of  $\text{NH}_4$  benzoate, followed by addition. of 0.5-60 g/l of methyl p-hydroxybenzoate.

The instant claims are obvious over the reference. It is the position of the examiner that the dimethylaminoethanol (DMAE) would meet applicants wetting agent required in claim 6 as it is a well known dispersing agent for water based compositions. While the reference does not specifically teach the same amounts of components (for the ammonium benzoate, triazole and/or wetting agents), one of ordinary skill in the art at the time the invention was made would have considered the invention to have been obvious because the compositional proportions taught by the reference overlap the instantly claimed proportions and therefore are considered to establish a prima facie case of obviousness. It would have been obvious to one of ordinary skill in the art to select any portion of the disclosed ranges including the instantly claimed ranges from the ranges disclosed in the prior art reference, particularly in view of the fact that;

"The normal desire of scientists or artisans to improve upon what is already generally known provides the motivation to determine where in a disclosed set of

percentage ranges is the optimum combination of percentages", In re Peterson 65 USPQ2d 1379 (CAFC 2003).

Also, In re Geisler 43 USPQ2d 1365 (Fed. Cir. 1997); In re Woodruff, 16 USPQ2d 1934 (CCPA 1976); In re Malagari, 182 USPQ 549, 553 (CCPA 1974) and MPEP 2144.05.

### ***Conclusion***

4. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
